LinkedIn | GitHub | Portfolio

SUMMARY

A 4th-year Computer Science student at STI College Lucena with foundations in software development, cloud deployment, and CI/CD automation. Seeking a DevOps or Software Engineering internship to apply technical skills, gain industry experience, and contribute to reliable, scalable systems.

EDUCATION

Bachelor of Science in Computer Science Expected Graduation: 2027

STI College Lucena — Lucena City, Philippines

- **Cumulative GWA:** 1.66 (As of SY 2025-2026 2nd Term)
- **Relevant Coursework**: Network Technology, Operating Systems, Data Structures & Algorithms, Software Engineering, Information Assurance & Security, Artificial Intelligence, and Database Management Systems.

TECHNICAL SKILLS

- **Cloud Platforms**: Microsoft Azure, Cloudflare Workers, Cloudflare Tunnel, Vercel
- **DevOps Tools**: Docker, Docker Compose, Git, GitHub Actions, CI/CD
- **Operating Systems & Scripting**: Linux (Fedora), Bash, Python
- **Languages**: TypeScript, Next.js, React, Tailwind CSS, Vite
- **Backend Development**: Java, PHP, MySQL, Node.js

PROJECTS

Thready: An AI-Enhanced Web-Based Production Management System (Thesis)

Role: Frontend Developer | DevOps Lead

- Developed frontend workflows for production orders, multi-employee task assignments, and quality checks, consolidating garment production management into one system
- Deployed the Docker Compose stack to an Azure VM, with GitHub Actions CI/CD that redeploys through a self-hosted runner on every merge.
- Exposed the app through a Cloudflare Tunnel, with no web ports open on the VM and admin access over Tailscale.

Pakisuyo Express: An Ordering Site for a Local Delivery Service

Role: Independent Developer

- Built an ordering site to replace a manual Messenger order process for a Sariaya local delivery service. It has a validated order form, a delivery-area check and a directory of 150+ stores.
- Set up GitHub Actions CI with Playwright and Lighthouse gates, Netlify preview deploys, and production deploys of tested commits only.
- Implemented deployment safeguards that verify the latest tested commit and serialize production releases, preventing outdated builds from being redeployed.

CERTIFICATIONS & AWARDS

- Champion — STI College Lucena Local CodeFest Competition Tagisan ng Talino 2026
- Certificate of Participation — AppBuildersPH Hackathon 2026
- Associate AI Engineering for Developers — DataCamp
- Linux Essentials — Cisco Networking Academy (In Progress)
