ABOUT ME

A 4th-year Computer Science student at STI College Lucena with strong foundations in software development, database management, and DevOps practices. Experienced in containerizing applications with Docker and configuring CI/CD pipelines. Eager to improve my technical skills and problem-solving abilities as a Software Engineering Intern, contributing to reliable application development and scalable infrastructure.

TECHNICAL SKILLS

- **Cloud Platforms:** Microsoft Azure
- **DevOps Tools:** Docker, Docker Compose, Git, GitHub Actions, CI/CD
- **Operating Systems & Scripting:** Linux (Fedora), Bash, Python
- **Frontend Development:** TypeScript, Next.js 16, React 18.3, Tailwind CSS 3, Vite
- **Backend Development:** Java, PHP, MySQL 8, Node.js

PROJECTS

Thready: An AI-Enhanced Web Based Production Management System

- **Role:** Frontend Developer | DevOps Lead
- Designed and built a responsive web application using Next.js, TypeScript, and Tailwind CSS to streamline production tracking.
- Set up automated CI/CD workflows using GitHub Actions to streamline build testing and release deployments.

Amlgo: An Interactive AI-Powered Discord Bot

- **Role:** Independent Developer
- Developed an interactive Discord bot using Node.js, TypeScript, and external AI SDK APIs
- Implemented secure API endpoints, environment variable management, and automated command handling.

EDUCATION

Bachelor of Science in Computer Science

Expected Graduation: 2027

- **Relevant Coursework:** Data Structures & Algorithms, Software Engineering, Database Management Systems, Artificial Intelligence, Operating Systems, and Web Development.

CERTIFICATIONS

- STI College Lucena Local CodeFest Competition Tagisan ng Talino 2026 Champion
- AI Engineering for Developers - In progress
