ABOUT ME

A 4th-year Computer Science student at STI College Lucena with strong foundations in software development, database management, and DevOps practices. Experienced in containerizing applications with Docker and configuring CI/CD pipelines. Eager to improve my technical skills and problem-solving abilities as a Software Engineering Intern, contributing to reliable application development and scalable infrastructure.

TECHNICAL SKILLS

- **Cloud Platforms**: Microsoft Azure, Cloudflare, Vercel
- **DevOps Tools**: Docker, Docker Compose, Git, GitHub Actions, CI/CD
- **Operating Systems & Scripting**: Linux (Fedora), Bash, Python
- **Frontend Development**: TypeScript, Next.js 16, React 18.3, Tailwind CSS 3, Vite
- **Backend Development**: Java, PHP, MySQL 8, Node.js

PROJECTS

Thready: An AI-Enhanced Web Based Production Management System

- **Role**: Frontend Developer | DevOps Lead
- Designed and built a responsive web application using Next.js, TypeScript, and Tailwind CSS to streamline production tracking.
- Set up automated CI/CD workflows using GitHub Actions to streamline build testing and release deployments.

Pakisuyo Express: A Ordering Site for a Local Delivery Service

- **Role**: Independent Developer
- Built an ordering site that replaces a manual Messenger order process for Sariaya delivery service.
- Set up GitHub Actions CI with Playwright and Lighthouse gates, Netlify preview deploys, and production deploys of tested commits only.

EDUCATION

Bachelor of Science in Computer Science Expected Graduation: 2027

- **Relevant Coursework**: Data Structures & Algorithms, Software Engineering, Database Management Systems, Artificial Intelligence, Operating Systems, and Web Development.
